Professional Summary

Driven Software Engineer with a background in software testing and quality assurance. Proficient in modern web technologies, backend development, and database management. Experienced in writing clean, maintainable code and conducting thorough code reviews to ensure high-quality software. Seeking to leverage development skills and testing expertise in a full-time software engineering role.

Skills

- **Programming Languages:** JavaScript, C#, C++, SQL
- **Web Development:** React, Node.js, HTML, CSS, .NET Development, ASP.NET Core Web API
- **Database Management:** PostgreSQL, SQL Server
- **Testing & QA:** Postman, WebDriverIO, Manual Testing, Automated Testing
- **Tools & Version Control:** Git, GitHub, JIRA
- **Software Development:** OOP, Agile, API Integration
- **Cloud & DevOps:** Docker, Azure, CI/CD principles
- **Problem-Solving & Debugging:** Code Review, Refactoring, Troubleshooting

Projects

Expense Ease (Budget App)

- Developed a comprehensive budgeting application for tracking expenses and managing budget categories.
- Implemented advanced features including pagination, filtering, sorting, and secure user authentication to enhance user experience.
- Utilized React for the frontend, ASP.NET Core for the backend, and PostgreSQL for robust data management.

Focus Craft (Project Management App)

- Created a project management tool that supports task tracking, drag-and-drop functionality, and secure user authentication.
- Leveraged React for an intuitive user interface and ASP.NET Core Web API for backend services, enabling efficient project organization and management.

Peace Pulse (Spiritual Connectivity App)

- Built a spiritual tracking application that allows users to monitor prayer routines and access spiritual content through integrated APIs.
- Employed ASP.NET Core for backend development to ensure secure data handling and seamless user experiences with modern web technologies.

Work History

Software Test Engineer II

12/2023 to Current

Gaming Laboratories International LLC – Burnaby, BC

- Conducted code reviews and API testing for over 30 projects, ensuring compliance with specifications and reducing critical defects by 15%.
- Identified and documented high-priority bugs in JIRA, leading to a 25% faster resolution time and improved software quality.
- Collaborated with development teams to complete projects within tight deadlines, consistently meeting supplier requirements.

Software Test Engineer I

03/2022 to 12/2023

Gaming Laboratories International LLC – Burnaby, BC

- Executed regression and integration testing, improving software quality
- Documented results of testing and reported bugs on iGaming platforms.

Education

B.A.Sc. in Mechatronic Systems Engineering

12/2021

Simon Fraser University - Burnaby, BC

Dean's List, Spring 2019
